

SOBERANES FIRE

CA-BEU-003422

OPERATIONAL PERIOD

THURSDAY AUGUST 18TH 0700
to
FRIDAY AUGUST 19TH 0700

INCIDENT OBJECTIVES (ICS 202)

| | | | | | |
|---|--|--|---|--|--|
| 1. Incident Name: Soberanes | 2. Operational Period: Date From: 8/18/16 Date To: 8/19/16 Time From: 0700 Time To: 0700 | | | | |
| 3. Objective(s): <u>Management Objectives</u> <ul style="list-style-type: none"> Provide for and maintain public and first responder safety by utilizing the incident safety analysis process. Protect all critical assets at risk to include the redwoods, historical assets within the affected area, infrastructure and improvements, watershed, and transmission lines. Utilize tactics that promote protection of sensitive natural and cultural resources in the Ventana Wilderness. It is the Unified Incident Commanders' Leader's Intent to ensure collaboration at all levels of the incident. Be financially responsible for all management and fire suppression tactics. Foster and enhance community and political relationships. All management actions and efforts will be focused on serving, safeguarding and protecting the citizens and natural resources of Monterey County. <u>Control Objectives</u> <ul style="list-style-type: none"> Keep the fire inside the current perimeter in the Carmel Zone Keep the fire North of the Nacimiento-Fergusson Rd Keep the fire West of Carmel Valley and Reliz Canyon Keep the fire East of Hwy 1 | | | | | |
| 4. Operational Period Command Emphasis: Perimeter Control , Structure Defense, Improve Contingency Lines, Hold and Improve Existing Control Lines | | | | | |
| General Situational Awareness S. T. O. P. Stop Think Organize Proceed | | | | | |
| 5. Incident Action Plan (the items checked below are included in this Incident Action Plan): <table style="width: 100%; margin-top: 10px;"> <tr> <td style="width: 33%;"> <input checked="" type="checkbox"/> ICS 203 <input checked="" type="checkbox"/> ICS 204 <input checked="" type="checkbox"/> ICS 205 <input type="checkbox"/> ICS 205A <input checked="" type="checkbox"/> ICS 206 </td> <td style="width: 33%;"> <input type="checkbox"/> ICS 207 <input type="checkbox"/> ICS 208 <input checked="" type="checkbox"/> Map/Chart <input checked="" type="checkbox"/> Weather Forecast/Tides/Currents </td> <td style="width: 33%;"> <u>Other Attachments:</u> <input checked="" type="checkbox"/> ICS 220 <input checked="" type="checkbox"/> Safety Message <input checked="" type="checkbox"/> Fire Behavior Forecast <input checked="" type="checkbox"/> Training Message </td> </tr> </table> | | | <input checked="" type="checkbox"/> ICS 203 <input checked="" type="checkbox"/> ICS 204 <input checked="" type="checkbox"/> ICS 205 <input type="checkbox"/> ICS 205A <input checked="" type="checkbox"/> ICS 206 | <input type="checkbox"/> ICS 207 <input type="checkbox"/> ICS 208 <input checked="" type="checkbox"/> Map/Chart <input checked="" type="checkbox"/> Weather Forecast/Tides/Currents | <u>Other Attachments:</u> <input checked="" type="checkbox"/> ICS 220 <input checked="" type="checkbox"/> Safety Message <input checked="" type="checkbox"/> Fire Behavior Forecast <input checked="" type="checkbox"/> Training Message |

Soberanes Fire Weather Forecast

FORECAST NO: 26

NAME OF FIRE: Soberanes

PREDICTION FOR: 0700 Thu- 0700 Fri

UNIT: CA-BEU/LPF

SHIFT DATE: 8/18-8/19

SIGNED:

Incident Meteorologist- Matt Mehle

TIME AND DATE

FORECAST ISSUED: 1900 8/17/16

WEATHER DISCUSSION: Very little change is expected over the Soberanes Fire. Night and morning low clouds clearing back to the coast each afternoon will be common. Of greater importance are the conditions above the marine layer; very dry conditions with little to no humidity recovery will continue. Temperatures will remain mild over the ridges and hot across the interior. The lower portions of the Big Sur Coast will remain dramatically cooler and wetter than a majority of the fire. The general wind flow will switch to southerly for all locations, except for protected areas where terrain driven flow continues.

WEATHER FORECAST FOR THURSDAY:

WEATHER: Morning clouds, fog and patchy drizzle pulling back to the coast by 11 am. Clouds will linger along Sur Zone for most of the day. Patchy clearing poss in the afternoon. Transport winds will push smoke to the N - NE.

TEMPERATURES: 87-95 interior/ridges...80-85 mid slopes...Hwy 1 63-79.

24 HR Trend (down 3 coast)

HUMIDITY: Coast 50-60%...above 1500 ft/interior 10-20%.

24 HR Trend (little change)

20 FT WINDS:

RIDGETOP - Sur Zone – Southeast 2-4 mph gusts 6 mph becoming southwest during the afternoon at 5-10 mph. Gusts to 18 mph Hwy 1. **Seco Zone** –Southeast 2-4 mph in the morning becoming south-southwest 4-8 with gusts 11 mph in the afternoon.

SLOPE/VALLEY - Downslope/downcanyon 3-6 in the morning becoming ...Seabreeze and upcanyon 1400-2000 hours 4-8 mph gusts 10-12 mph.

Sur Zone/hwy 1 – light northeast/downslope in the morning switching west-southwest & gusty

Marine Layer: 1200-1500 feet.

WEATHER FORECAST FOR THURSDAY NIGHT:

WEATHER: Becoming mostly cloudy below 1500 feet, especially Sur zone and Carmel Valley. Smoke settling over the lower elevations. Coastal fog and patchy drizzle.

TEMPERATURES: 65-69 above 1800 feet. 52-58 along Hwy 1 and up the Carmel Valley.

HUMIDITY: Moderate recovery below 1800 feet 70-90%...15-30% above 1800 feet. Peaks may recover early then dry through sunrise. 90-100% near highway 1.

20 FT WINDS:

RIDGETOP - Sur Zone – South-Southeast 5-10 mph gusts 15 mph becoming 3-7 mph gusts to 10 mph. **Seco Zone** – South-Southeast 4-8 with gusts 10 mph becoming 3-6 mph overnight.

SLOPE/VALLEY - Evening upcanyons 4-7 mph...becoming downcanyon 2-4 mph overnight.

Sur Zone - downcanyon up to 10 mph overnight.

Marine Layer: 1200-1500 feet.

Extended Forecast: Only minor day to day changes expected as we head into the upcoming weekend. Increasing upper level moisture may bring some high level clouds over the Soberanes Fire.

WEATHER SUMMARY Similar to yesterday.

PLEASE REVIEW INCIDENT METEOROLOGIST FORECAST

OUTPUTS

FIRE BEHAVIOR

GENERAL

Yesterday we were at a historic high for ERCs and saw the largest increase in fire activity in more than a week. Today the fire activity will be very similar to yesterday. The fire will tend to be pushed in a northerly direction on the upper third of slopes where prevailing winds and up-canyon winds come into alignment. The rest of the fire will primarily be terrain driven. The fire should not be active below the marine layer (1200') until it pulls away from the coastline. It needs to be noted that we have seen active burning in fine fuels within the marine layer on this fire. Expect poor overnight RH recoveries and a second burn period in the pre-dawn hours. The fire will continue to back down into the Carmel River Drainage and may be at, and possibly across the Carmel River between Hiding Canyon Camp and Buckskin Flat Camp (Branch III). From Los Padres Reservoir to Elephant Mountain Suppression efforts in Branch III and have checked the spread of fire above the Carmel River. Heavier fuels at the bottom of moist drainages will slow the progression of fire across creeks. When the fire does cross a drainage, expect a slope reversal and a precipitous increase in ROS, intensities and a continuous build of momentum until it reaches the ridgeline. The fire is burning primarily in a mix of brush and an oak understory. The fire on the South side of Ventana Creek is burning into the old Basin Fire scar; snags, skeleton brush and heavy downed fuels are abundant and will increase the fire line intensity. **Live fuel moistures are at or near critical levels (LFM = 70%). ERC's are above the critical 97% percentile and we have seen large fire growth on this fire at these levels.**

Optimal Alignment, Peak Burning Conditions

Probability of Ignition = 90% Spotting Distance= up to 1/2 Mi. ROS 75-95 ch/h for uphill runs
Fine Dead Fuel Moisture = 3% 10hr Fuels= 3-4% BI 116 ERC 79 1-2 ch/hr for backing

SPECIFIC

Carmel Zone BRANCH I, II, IX

No forward fire progression is expected. Interior islands and heavier fuels will continue to burn out.

Seco Zone BRANCH III, IV, V

Just west of Uncle Sam Mountain the fire is actively backing further south towards Hiding Canyon Camp. Minimal fire behavior observed east of Uncle Sam Mountain. The fire continues to hold on the north side of the Carmel river drainage. Monitor for rollout in this steep and rugged terrain. Rollout on the north side of the drainage will result in an uphill run back into the main fire. Fire established on the south side of the Carmel drainage will run uphill in continuous fuels with rates of spread of 80-85 ch/hr, and 15 -20' flame lengths in brush fuels.

Sur Zone BRANCH VII, VIII

Div. N: Fire is established in and just past the bottom of Logwood Creek drainage. Expect flanking fire to continue to the south below the control line. Short intense runs towards the line are possible in small drainages perpendicular to the line. Spots over the line should be expected with these runs but should be picked up easily in the light fuels. With the low RH the fire will remain active at night until the smoke inversion sets up.

Div. O/P: No forward progression expected. Heavier fuels in the timber stringers will continue to hold heat. Falling snags and roll out will continue to challenge containment for at least one more burn period in Div. O

AIR OPERATIONS

Expect the smoke and marine layer to lift around mid to late morning.

SAFETY

10 hour fuels and ERC are above critical thresholds!

Snag patches are very common. Look up to live!

SAFETY MESSAGE

SOBERANES

16-CA-BEU-003422 – August 18, 2016 – 0700 TO 0700

Y**

STEEP TERRAIN

MAINTAIN GOOD FOOTING

Watch Out

- Loose soil (Ankle and Knee strains / sprains have been reported on the Soberanes)
- Unstable material on steep terrain, loosening rocks and logs
- Burning or Smoldering Stump Holes, or animal burrows

Mitigation

- Brief your crews and prepare them for the loose soil **WATCH YOUR FOOTING**
- **WATCH OUT!!** For rolling material, Call out, "**ROCK!!**," when material breaks loose
- Identify any burning and smoldering stump holes in your division

HAZARD TREES

DROUGHT STRESSED TREES IN and AROUND the FIRE AREA

Watch Out

- Working in and around redwood, conifer and oak trees
- Be aware of snags
- Fire weakened and drought stressed trees

Mitigation

- Be vigilant and alert, "**Look-Up**" when working around any trees
- Post lookouts / Avoid resting under trees / Identify other sources of shade
- Isolate **HAZARD** trees with red and white, "**THREE STRIPES** you're out" flagging

HEAVY EQUIPMENT

DOZERS and MASTICATORS are ASSIGNED TO MULTIPLE DIVISIONS

Watch Out

- Operators may have limited visibility
- Operations may cause rock and bolder roll out –**WATCH OUT!**
- Maintain appropriate working distance

Mitigation

- Be sure the operator has eye contact with you prior to approaching any equipment
- Maintain high levels of situational awareness when working around heavy equipment
- Post lookouts and spotters as appropriate

Shayto

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the RX and TX reversed.

Air Guard must be in the last channel of every plan (168.6250, PL 110.9 on TX only) Once 205 is complete, email it to com205@fire.ca.gov or fax to the local ECC and ask them to email it for you.

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as it programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the KX and IX reversed.

Air Guard must be in the last channel of every plan (168.6250, PL 110.9 on TX only) Once 205 is complete, email it to com205@fire.ca.gov or fax to the local ECC and ask them to email it for you.

DEMOB
SOBERANES INCIDENT
CA – BEU – 003422

- Resources must Check-In prior to the Demob process.
- In order to be deemed excess, supervisors must submit an ICS #213 to the Resources Unit.
- Please return all supplies and equipment, either at ICP-Toro Park or the camp assigned to, prior to reporting to Demob (ICP – Toro Park)
- Strike Team Leaders and/or Overhead personnel report to Demob (ICP-Toro Park) at the times posted on the Tentative Demob List, which is posted around the Incident Base and through the QR Reader. After receiving the #221, the STEN will report to ground inspection.

*Engines will report to ground support (Fort Ord) at the times posted. The engines will go through vehicle inspection and weed wash then wait for their STEN to meet up with them at Fort Ord.

- When the strike team and leaders are completed with ground support, the strike team will report back to ICP – (Toro Park) to finish their #221.
- Resources will get signatures from the following units:
 - Motels
 - Supply
 - Ground Support
 - Weed Wash
 - Training (If they have a trainee)
 - Communications
 - Documentation
 - Time
 - Demob
 -
- After the #221 is given to Demob, all CAL FIRE, Federal, and Local Government personnel are approved to travel back to home unit or a reassignment.
- Air Travel: For Federal resources, provide a #213 to the Demob Unit with the following information:
 - Full Name: (As it appears on Drivers License)
 - Date of Birth
 - Destination jet port and departure jet port.
 - Phone Number and Email
 - Date of Travel

FIRE SUPPRESSION REPAIR PLAN SOBERANES FIRE: CA-BEU-003422

Fire Suppression Repair is the repair of damage caused directly by fire suppression activities. It is not the repair of areas damaged by the fire activity itself such as burned material and secondary damage such as falling trees or erosion from hydrophobic soils. We are responsible for repairing only the damage caused by fighting the fire. We are also not responsible for upgrading facilities beyond their pre-fire condition.

Instructions for suppression repair during mop-up

While performing mop-up operations dozer or excavator operators will install waterbreaks on all dozer lines while dozers will install waterbreaks on secondary access roads. Dozer lines amongst the structures shall have the berms pulled and waterbreaks installed where necessary with hand crews to minimize the impacts on residents. Hand crews will install waterbreaks on all handlines, and waterbreaks on dozer lines situated on extremely steep slopes may also need to be installed by hand crews.

Scattered trash shall be collected and deposited in trash piles. Trash piles will be removed and placed at drop points either before or while hose lays are collected. Police your areas and clean them up as events wind down.

Inventory and Mapping

Suppression overhead and other personnel will document repair needs and their location. This information will be given to the Fire Suppression Repair Group. **GREEN** flagging will be used to designate area in need of repair. The type of repair/instructions will be written directly on the green flagging for ease of use.

Objectives

- Install waterbreaks while crews and dozers are actively onsite on roads, trails, and handlines damaged by fire suppression.
- Waterbreaks shall have proper angle and open outlets to insure effective drainage.
- Repair damaged fences (remember, those portions damaged by suppression efforts, not by the fire itself).
- Restore barriers on roads that were previously closed but opened for suppression activities.
- Insure that drainage is provided at crossings, ditch drains, remove deposited material, and stabilize approaches.
- Report any damage or damages mitigation to the Fire Suppression Repair Group.
- Complete all repair work as determined by the Fire Suppression Repair Specialist prior to final demobilization.

Firelines/Existing Fuelbreaks/Staging Areas/Safety Zones/Heliports/Drop Points

- Remove debris deposited during suppression activities, including flagging and signs.
- Install waterbreaks where necessary for erosion control.
- Pull berms back onto disturbed areas, except in areas identified as needing a berm to serve as a barrier for roads/trails.
- Spread brush across the disturbed areas to provide ground cover and a seed source.

- Masticators/excavators/dozers with brush rakes or grapples will be utilized on existing fuelbreaks utilized during suppression efforts to reduce any excessive fuel loading.

Roads

- Clean culverts and drainage facilities plugged with soil and debris deposited during suppression activities.
- Re-establish cross drains and drainage if removed or made inoperable by suppression activities.
- Use cut brush – if available and nearby – to block off potential OHV access.
- Remove outboard berms created during suppression activities and incorporate into the road surface.

Watercourses

- All slash; soil and debris deposited into watercourses during suppression activities shall be removed.
- All loose soil must be pulled away from the watercourse and stabilized (graded smooth, and slash packed for cover).
- If excavated, the stream channel will be wider than the natural channel and set to natural grade. The approaches to the crossing will be sloped back to prevent stream bank failure.

Archaeological or Historic Sites

Equipment shall not to enter archaeological or historic sites unless the operator is closely supervised by an Archaeologist or Fire Suppression Repair Specialist. Many known sites have been flagged by the incident archaeologists. Archaeological or historic sites are delineated in the field with several types of flagging colors and designs, but generally flagging that appears to be encircling a given feature must be avoided. Known flagging schemes are as follows:

| | |
|-----------------------|--|
| CAL FIRE: | Yellow and black stripped & Orange and black stripped |
| U.S.F.S. | Yellow and black stripped tied with blue |
| Santa Lucia Preserve: | White and blue tied together & Yellow and black stripped |

Waterbreaks/Waterbar/Cross Drain spacing

| | | | | |
|---------------------------|---------|---------|--------|------------------------------|
| Line or Road Gradient (%) | 0-10% | 11-25% | 26-50% | 50%+ |
| Spacing | 200 ft. | 100 ft. | 75 ft. | 50 ft. (25' on Federal land) |

Waterbreaks shall be cut diagonally with a minimum depth of 6" into existing grade with a 12" berm for a minimum height of 18". Waterbreaks will be installed at a 30-45 degree angle. Outlets shall be open and directed into non-erodible material.

Conflicts with Suppression Activities

Postpone repair activities that hamper access or other suppression actions. The location of needed repair actions shall be noted and relayed to the Fire Suppression Repair Group. DO NOT compromise fire lines by spreading flammable material across them.

Archaeological and Historical Sites Fireline Guidance for the (NAME) Incident

Do not compromise safety for the protection and preservation of archaeological and historical sites. When feasible and prudent:

1. Be on the lookout for prehistoric and historic sites. Prehistoric archaeological sites include boulders and bedrock with mortars and cupules, holes and grinding surfaces, temporary camps containing scatters of stone flakes, and deposits of dark brown to blackish soil with shell fragments (middens) occurring in layers or mounds on flat surfaces near sources of water, along coastal areas and wetlands, along ridges and saddles, and other areas suitable for camping. Historic sites include old wooden cabins, barns, corrals and other buildings, rock foundations and historic artifact scatters. These kinds of resources are often found in the same kinds of environmental settings as prehistoric camp sites.
2. Some archaeological and historical sites have not been flagged yet. If you observe artifacts, features, or sites, attempt to avoid dozing or driving through and/or parking on these sites, if feasible, especially with heavy equipment.
3. If you can't avoid sites, minimize disturbance as much as feasible, only clearing the surface to as minimal a depth and width as necessary.
4. Leave all artifacts in place. Some artifacts may have been intentionally placed for religious or ceremonial reasons.
5. When a site is discovered, flag it for visibility and report its location to the Division Supervisor. If feasible, note locations of discovered resources on a map. Better yet, take a GPS reading. Leave information with the Plans Section so that the sites can be relocated and protected during both the suppression and fire suppression repair phases of the Incident.
6. If you encounter a burial or other human remains, cease work in that area immediately and contact the CAL FIRE Archaeologist. State law requires that CAL FIRE then contact the County Coroner, who will then determine if the remains are part of a crime scene. If the Coroner determines that the remains are Native American, State law requires the Coroner to contact the Native American Heritage Commission in Sacramento.

Forest Service Wilderness and California State Parks Special Instructions – Resource Advisor

DOZER LINES - DIVISIONS K, M, P, and CONTINGENCY LINES

- Dozer lines will not exceed 50 feet in width except for safety reasons.
- Dozer lines in Wilderness will be repaired later; construct line to minimize impact.
- Do not push brush off steep hillsides – it will be spread over the line during repair.
- Minimize removal of top soil – it will be spread back over the line during repair.
- Avoid riparian areas, seeps and springs.
- Avoid archeological sites flagged with black/yellow and blue ribbon

Wilderness Minimum Impact Suppression Tactics (MIST)

The intent of Minimum Impact Suppression Tactics is to suppress a wild fire with the least impact to the land. Fire conditions and good judgment dictate the actions taken. Consider what is minimally necessary to halt fire spread and contain it within the fireline.

FIRELINE CONSTRUCTION PHASE:

- Use cold-trail, wet line or combination when appropriate.
- Allow fire to burn to natural barriers.
- If constructed fireline is necessary, use minimum width and depth to check fire spread.
- Remove or limb only those fuels that if ignited would have potential to spread fire outside the fireline.
- Minimize cutting of trees, burned trees, and snags unless determined they will cause fire spread across the fireline or endanger workers.
- Cut brush or small trees flush to the ground; camouflage the cut surface with soil or brush.

HELISPOT CONSTRUCTION:

- Consider using a long line remote hook in lieu of constructing a helispot.
- If construction is necessary, consider natural openings, or previously used areas. Cut only what is necessary to achieve safe operating space.

INCIDENT TRAINING MESSAGE

ALL TRAINEES

**Scan the QR Code or type in the link.
Form drop boxes are located @ Molera & Patriot
Camp, & Toro ICP**

<https://goo.gl/jT5BaF>

**Demobilizing trainees MUST close out with the TNSP
and bring a 225 Evaluation and signed Task Book**

**To close out: The Trainee AND Trainer need to be
present**

**TNSP Location: Toro ICP behind Check- In and
Next to Documentation**

CAL FIRE

INCIDENT MANAGEMENT TEAM

WATER USAGE PLAN

California Drought Emergency

The following shall be considered and implemented by all fire resources as a means to provide maximum efficiencies when utilizing water resources, while minimizing the impacts to private and public water supplies. Accountability shall be maintained for all water supplies that are utilized and care should be applied to ensure proper replacement and/or reimbursement to the supplier/ owner.

Fireline personnel- (During mop up operations)

- Use of Pencil Hose and Garden Nozzles with Shut-Offs.
- Use of Back pumps.
- Dry Mop-up and consolidation of heavy fuels to areas where they can burn out safely
- Locate/ Relocate Firelines to lighter fuels or natural barriers when safe.
- Set up and use portable tanks in anticipation of longer transport times for Water Tenders.
- Use of foams, gels and other water enhancers.
- Evaluate need to mop up in excess of 200 feet from fireline

Road Maintenance and Repair-

- Monitor and water roads only when and where needed.
- Water when most effective (evening and nights).
- Use chemical treatments when available (Magchloride, Omni bind etc).
- Consider use of tertiary or treated water (sp)

Aviation Operations-

- Use of Gels, Foams and Retardants. Set up portable plants.
- Consider Blivits and Pencil hose for interior mop up operations as opposed to numerous bucket drops.
- Establish and use pre-use agreements for existing and known water sources.
- Use large watershed dip sites when able. Minimize use of small, static ponds and lakes.
- Maintain accountability of water used and locations of dip sites.
- Evaluate need for interior bucket drops

Private Water Supplies-

- Notify property owner as early as possible.
- Minimize usage and develop alternative water supplies when and where appropriate.
- Track usage (meter, 214 form) and develop a plan to replace water.
- Make arrangements for reimbursement and damage claims if needed.

Public/ Municipal Water Supplies-

- Notify Agency as soon as possible and request a representative to the incident.
- Identify fill areas and request metering devices. Place on incident map.
- Use alternative or reclaimed water sources when available. Place on incident map.
- Make arrangements for reimbursement and damage claims if needed.

Management and Supervision-

- Use leaders intent and consider establishing Water Conservation as a Management Objective.
- Consider complexity of water use on incidents. Consider establishing a Water Supply Group Supervisor to coordinate additional resources to support the incident needs.
- Complete the Water Usage Report daily and turn in to Finance
- Review this check list and brief daily.

Information: _____

The intent of this document is intended to track, record and validated the amount of water used on a incident. It's not intended to review the performance of equipment using the water on an incident.

FIRING OPERATION CHECKLIST

Location: _____

Date: _____ Time: _____

Firing Supervisor _____

1. Personnel Briefing

- ☐ Objectives
- ☐ Conditions (fire environment)
- ☐ Resource assignments identified
 - ☐ Firing personnel
 - ☐ Holding forces
 - ☐ Lookouts
- ☐ Ignition plan/sequence
- ☐ Communication Plan
- ☐ Contingency Plan
- ☐ Safety issues

2. Go / No-Go

- ☐ All personnel briefed
- ☐ Weather forecast reviewed
- ☐ Resources in place
- ☐ Lookouts posted as needed
- ☐ Anchor and termination firing points identified
- ☐ Communications systems in place
- ☐ Fire behavior forecast reviewed
- ☐ Escape routes and safety zones established and made known
- ☐ Adjoining forces/Air Attack notified

3. Approval Prior To Firing

- ☐ Division Supervisor
- ☐ Branch Director
- ☐ Operations

4. Other Notifications

- ☐ Other: _____
- ☐ Other: _____

Attach Firing Operations Checklist to ICS-214

Human Resource Message

Soberanes Fire

August 18, 2016

What Makes Communication Difficult?

Words Mean Different Things to Different People

Look up 500 different words in a dictionary and you will find over 2,500 meanings and/or definitions for those same words. To communicate effectively, both the speaker and the listener must have a mutual understanding of the words they use.

The Presenting Problem May Not Be the Major Concern

People often are hesitant to talk about what is really bothering them. The “real issues” are what they tend to hide most carefully. Trying to solve minor problems while the real problems are not clearly understood does not work. Doing this is a major source of ineffectiveness.

Filters Distort What People Hear and Say and Emotions Are Blinding

Our own expectations, experiences, values, biases, self-images, beliefs, ideas, worldview, etc. create a “zone of distortion”...the filter that distorts our interpretation of another person’s message. People are often unaware of how their emotions affect communications with others and emotions can literally put some people out of control and prevent them from communicating effectively.

Here’s what to do to improve communication:

Stand in the other person’s shoes. You have stood in the other person’s shoes when you repeat their point of view back to their satisfaction.

Drop your point of view long enough to take another way of seeing things.

Remember the point of communication is not to win or be right, but to either bring people together or clarify their differences.

“Leadership does not instill privilege, it confirms responsibility.”

Janine Summy, Human Resource Specialist
Fran Lindquist, Human Resource Specialist Trainee
Linda Overton, Human Resource Specialist Trainee
